DRAFTOPS

This report gives you the Yards variance between the offense and the defense. Meaning, the total number of yards an offense averages minus the total yards the defense gives up equals the variance. For example if an offense averages 300 total yards and that defense gives up 350 total yards, this offense has the opportunity to get those extra 50 yards. We then break it down by the phase of the game, Passing, Run and receiving.

Here look for positive numbers. the higher the positive number the better.

In the example below you will see that Baltimore Ravens average 305.40 total yards and that the Buffalo Bills Defense averages giving up a total of 355.10 yards equalling a total variance of 49.70 meaning the ravens can get upto 355.10 yards
